

National Sector Managers

In July 2009, the Australian Government announced \$19.1 million in funding to boost Australian industry participation. As part of this announcement, Industry Capability Network (ICN) received extra funding for the appointment of National Sector Managers.

The primary focus for these roles is the promotion of competitive Australian suppliers to major projects and the communication of opportunities to small to medium enterprises (SMEs). The national sector managers take on a coordination role within ICN and are instrumental in developing their sector within Australia.

The National Sector Managers work with government, industry and local suppliers to help maximise Australian and New Zealand content across key sectors such as clean technologies, health, national broadband network, oil and gas, rail and water.

For more information please contact the relevant National Sector Manager on the details below:

Dr David Anderson	National Sector Manager - National Broadband Network (NBN)	(03) 6233 5781
